EDUCATION

FEDERAL UNIVERSITY OF TECHNOLOGY, AKURE
Computer Science

Ondo State, Nigeria
01/2024 - 2028

SKILLS SUMMARY

- Languages: Javascript, Python, Typescript, C, SQL.
- Frameworks: React, Django, Flask, Nextjs, Express.
- Tools: Git, Docker, Figma, MySQL, SQLite
- Platforms: PyCharm, Jupyter Notebook, Visual Studio Code, Github
- Soft Skills: Technical Communication, Collaboration & Leadership, Adaptability & Continuous Learning, Analytical Problem-Solving.

WORK EXPERIENCE

FRONTEND DEVELOPER
DEVELOPMENT TEAM LEAD

| NexusmindAI

10/2024 - 01/ 2025

- Collaborated with other developers in engineering the User Experience on product websites.
- Served as Dev Team Lead, reviewing pull requests, maintaining code quality, and reducing technical debt.
- Communicated team achievements and project progress effectively to the Project Manager, bridging frontend and backend efforts.

BACKEND ENGINEER INTERN | Darq Envoy

06/2025 - 09/2025

- Developed backend features and APIs to support scalable web applications, focusing on performance and reliability.
- Collaborated with frontend and product teams to deliver seamless end-to-end solutions.

FRONTEND ENGINEER INTERN | HNG Tech

10/2025 - 12/2025

- Collaborated with other developers in engineering the User Experience on product websites.
- Served as Dev Team Lead, reviewing pull requests, maintaining code quality, and reducing technical debt.
- Communicated team achievements and project progress effectively to the Project Manager, bridging frontend and backend efforts.

FRONTEND ENGINEER | Dlab Technologies

06/2025 - Present

- Engineered a modular frontend architecture, ensuring the codebase remains maintainable and performant as the product scales.

FULLSTACK ENGINEER | DeepFunding(Deep Lab)

09/2025 - Present

- Worked within high-velocity "pods" to build and deploy MVPs, bridging the gap between raw AI models and user-facing web applications..

PROJECTS

End-to-End Encryption Chat App | [LIVE DEMO](#)

- Developed a secure, cross-platform messaging app ("Message50") with end-to-end encryption ensuring that both text and media (images, videos, documents) remain private, available only to sender and recipient.
- Delivered a fast, user-friendly experience across devices using a sleek interface and real-time message delivery, fostering seamless communication without compromising on security.

Social Media Bots with Multi-modal Capabilities | [GITHUB](#)

- Built Whatsapp & Telegram bots OpenAI and Gemini APIs supporting text, voice, and image interactions through a scalable Python Flask backend.
- Achieved real-world adoption with 50+ active users, demonstrating practical deployment, usability, and impact

AI-powered Recipe Generation App | [LIVE DEMO](#)

- Built a web app using Next.js + Tailwind that lets users upload a picture or enter text to instantly generate step-by-step recipes via the Gemini API.
- Optimized user experience with server-side rendering, clean UI, and image upload workflows, delivering fast, intuitive recipe generation across devices.
